

Llandudno Cluster More Able and Talented Policy

Introduction

- In our school we aim to provide a curriculum that is appropriate to the needs and abilities of all our children. We plan our teaching and learning in such a way that we enable each child to reach for the highest level of personal achievement. This policy helps to ensure that we recognise and support the needs of those children in our school who have been identified as 'gifted', 'more able' and 'talented' according to national guidelines.
- In these guidelines the term 'gifted' refers to a child who has a broad range of achievement at a very high level. Those children who are gifted often have very well-developed learning skills. The term 'talented' refers to a child who excels in one or more specific fields, such as sport or music, but who does not perform at a high level across all areas of learning. **In our school, however, we use the terms 'very able' and 'more able' for children who, at a national level, are referred to as 'gifted' and 'talented'.**
- We respect the right of all children in our school, irrespective of differences in ability, to access a number of areas of learning, and to develop the knowledge, skills, understanding and attitudes that are necessary for their self-fulfilment and eventual development into active and responsible adults
- Our vision statement talks of valuing the individuality of all our children. The aims of our school make specific reference to teaching and learning that takes into account the needs of all children. They also identify the commitment to giving all our children every opportunity to achieve the highest of standards. This policy guides the way in which this happens for our more able and very able children

Aims and objectives

- Through this policy we aim to:
 - ensure that we recognise and support the needs of our children;
 - enable children to develop to their full potential;
 - offer children opportunities to generate their own learning;
 - ensure that we challenge and extend the children through the activities that we provide for them;
 - encourage children to think and work independently.

Identification of more able and very able children

- We use a range of strategies to identify more able and very able children. The identification process is ongoing and begins when the child joins our school. As we plan work for children, we identify groups of children who require extended attention and we will register them and review their progress throughout the year. Through discussions with parents and carers, we are able to add further details of the child's interests to these records.
- Throughout the children's time in school, we assess them regularly to ensure that they are making the sort of progress that we are expecting of them in their personal targets. We identify them as more able and very able children when they achieve high levels of attainment across the curriculum, or in particular skills or aspects of subjects. We will use standard tests (Spelling, reading and Mathematics) to reinforce these records.

Aptitudes in English and mathematics

- More able and very able children in English are identified when they:
 - demonstrate high levels of fluency and originality in their conversation;
 - enjoy stories and responds to a range of texts at an advanced level;
 - use a wide vocabulary and enjoy working with words;
 - possess a creative and productive mind and use advanced skills when engaged in discussion;
 - show an awareness/ some knowledge of letter sounds/recognises more than six letter sounds;
- More able and very able children in mathematics are identified when they:
 - explore a range of strategies for solving a problem;
 - are naturally curious when working with numbers and investigating problems;

Teaching and learning style

- Teachers in our school plan carefully to meet the learning needs of all our children. We give all children the opportunity to show what they know, understand and can do, and we achieve this in a variety of ways when planning for children's learning by providing:
 - a common activity that allows the children to respond at their own level;
 - an enrichment activity that broadens a child's learning in a particular skill or knowledge area;

- an individual activity within a common theme that reflects a greater depth of understanding and higher level of attainment;
- the opportunity for children to progress through their work at their own rate of learning.
 - Children meet a variety of organisational strategies in the school. Each strategy supports all children in their learning, but gives due regard to the more able and very able learner.
 - The children will also have the opportunity to experience a range of educational visits that further enrich and develop learning.

Management strategies

- The Headteacher co-ordinates the provision and practice within the school for more able and very able children. The co-ordinator's role includes:
 - ensuring that the more able and very able register is up to date;
 - monitoring planning to ensure that suitable tasks and activities are being undertaken by more able and very able children across all curriculum areas;
 - regularly reviewing the teaching arrangements for more able and very able children;
 - monitoring the progress of more able and very able children through termly discussions with teachers;
 - supporting staff in the identification of more able and very able children;
 - providing advice and support to staff on teaching and learning strategies for more able and very able children;
 - liaising with parents, governors and LEA officers on issues related to more able and very able children.
 - The co-ordinator for our policy on more able and very able children monitors this policy on a regular basis and gives feedback to the governing body. The monitoring includes feedback from parents and children, as well as regular classroom observations of teaching and learning.
 - The co-ordinator assesses samples of work in the portfolios from more able and very able children, in order to demonstrate the standards that they are achieving. We use these examples to inform the process of identification of more able and very able children
